Director

LuCa National Training Network

lucatraining.org

The LuCa National Training Network provides training, materials, and technical assistance for professionals who educate primary care providers and other health care professionals on lung cancer prevention, early detection, treatment, and survivorship.

LuCa offers:

- Web-based training, including interactive CME/CE learning modules and webinars.
- Practice tools and resources for both providers and patients.
- Technical assistance on how to reach providers through academic detailing, group presentations, and webinars.
